the ZANFEL ZONE

Your Information Resource for Poison Ivy, Oak and Sumac

Volume 9, Issue 1

Welcome back to the Zanfel Zone! Spring is here and poison ivy, oak and sumac plants have reappeared in our yards, work sites, hiking trails, and gardens. If you, your family, friends, or co-workers experience a poison ivy, oak, or sumac rash, Zanfel can be found in the first aid section of your local pharmacy.

Identifying Poison Ivy And Poison Oak In The Spring

Once the temperature warms up in your part of the country, the poison ivy and poison oak plants' leaves will begin to emerge from their buds. The immature leaves start out with a red, waxy appearance. As the leaves grow they turn green. Below are some pictures to help you identify these plants.

Eastern Poison Ivy

Eastern Poison Oak

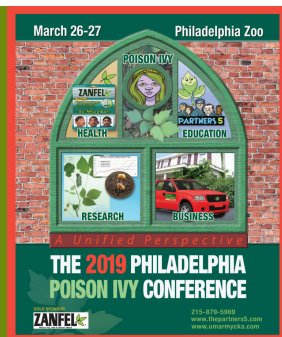

Western Poison Ivy

Western Poison Oak

7th Annual Poison Ivy Conference

Zanfel Laboratories was proud to sponsor and attend the 7th Annual Philadelphia Poison Ivy Conference. The conference was held in March 2019, at the Philadelphia Zoo.

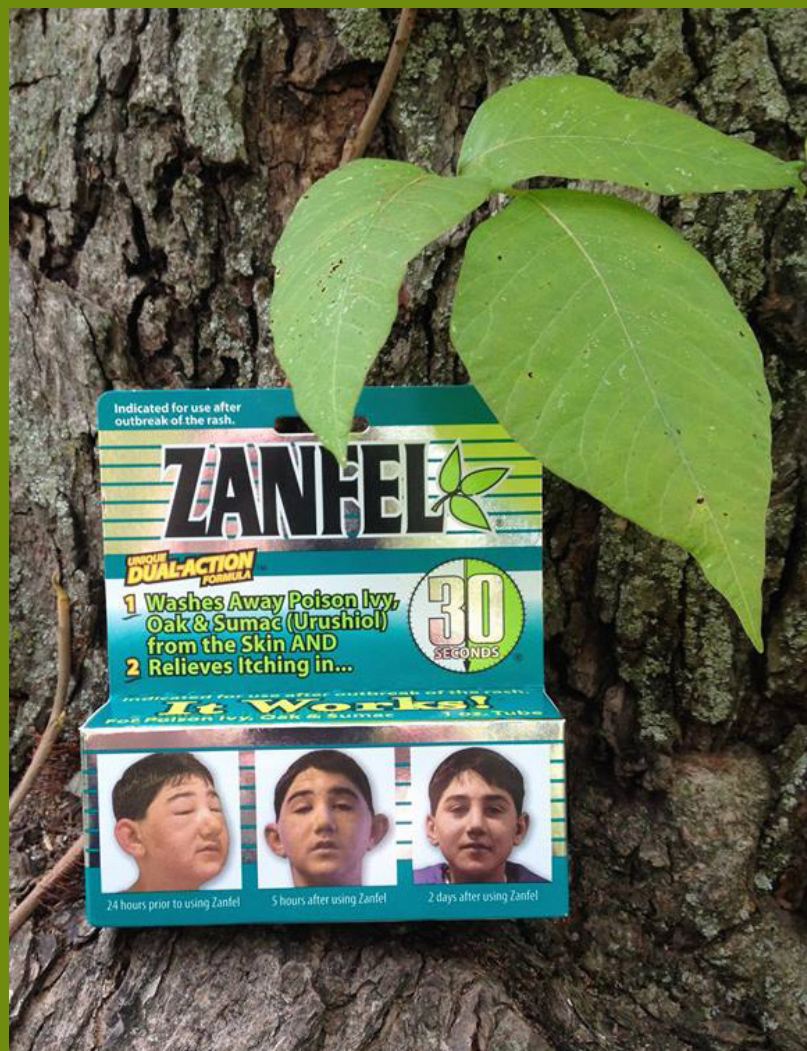

Attendees learned about identification of poison ivy, poison ivy plant removal techniques, new poison ivy plant terminology, new poison ivy plant research, and effective treatment of poison ivy rash.

Zanfel Laboratories would like to thank Umar Mycka, Poison Ivy Horticulturist, for producing a world class event where we learned so much about the nature of poison ivy! <http://umarmycka.com>
